5436 Crossings Drive, Rocklin, 916-824-1310

***The Entertainers Garden***

A hillside can be challenging for your garden oasis dreams, but by creating multiple levels to accommodate a myriad of uses you can make it a wonderful place to enjoy family and friends. These homeowners have done just that for fun and relaxation, then enhanced their space with Japanese maples, a variety of flowering plants, citrus trees, berries, grapes, and raised vegetable beds.

***The Vineyard Garden***

Sweeping views encompass this landscape designed for outdoor comfort, wine making, and pets. Varietal grape vines and olive trees adorn the slopes and striking red maples lead the way toward waves of artfully trimmed rosemary which frame a walk to the pool. Here's where you'll find a dog-proof flowering ground cover! This is the perfect place to just kick back and watch the sunset.

***The Casual Garden***

Sculpturally trained mature olive trees and electric pink cordyline make an eye catching front entrance while large crape myrtles and fanciful touches lead to a serene backyard with pathways that meander through flowering shrubs and vines to a shady patio with the soothing sounds of a trickling fountain. Wonderfully compact with easy maintenance, yet feels like you're away from it all.

***The Tranquil Garden***

Now that the lawn is gone, a graceful, drought tolerant landscape is evolving with lots of blooming color and texture. The backyard is a retreat of flowers, trees, small flowing lawn areas, and raised strawberry beds surrounding a natural looking pond with waterfall and overlooked by a raised deck perfect for lounging and entertaining.

### ***The Woodland Garden***

Native oaks allow dappled sunlight onto the steps and pathways of this sloping garden through a variety of ornamentals and flowers, by a fence trellised with delicious berries to a secluded fire pit nestled behind a rock garden filled with a collection of succulents and cactus. Raised vegetable beds and fruit trees in the side and front areas provide tasty produce all year long.

### ***The Family Garden***

A family farm continues to transform into an extensive array of many smaller themed gardens flowing together to create one big delightful experience. Take time to explore the various garden rooms, flower and vegetable fields, creekside and forest pathways, and unique succulent plantings as well as charming and fanciful displays at every turn.
